

Technology Strategy

Actionable Strategies collaborates with client leadership to formulate and execute on technology strategy. Key elements of enabling strategy are business-facing.

- ▀ Alignment to business strategy
- ▀ Performance metrics aligned to business goals
- ▀ Service level agreements
- ▀ Governance and operating models
- ▀ Initiative / project portfolio rationalization

Information Management

Information is the lifeblood of organizations. Actionable Strategies can help you work efficiently along your entire, distributed value chain, while providing insight into the measures and future views that enable critical business decisions.

We have extensive experience in the design, implementation and extension of systems that tie data, applications and knowledge together to help organizations drive their business forward with confidence.

- ▀ Data warehouses and data marts
- ▀ Enterprise/Master data management
- ▀ Executive dashboards and decision support systems
- ▀ Mobile application design and development
- ▀ Legacy system perpetuation
- ▀ Application design and development
- ▀ Knowledge management systems
- ▀ Value chain integration
- ▀ Customer-facing systems

Planning and Process

Effective plans and efficient processes are the hallmarks of great companies. Successful technology projects require that these be combined with the right people to extract all of the potential that complex initiatives present. Actionable Strategies provides unbiased expertise that facilitates rapid decisions based upon insightful and thorough analysis.

- Alignment, planning and budgeting
- Services model design and deployment
- Project revitalization and recovery
- Program management establishment
- Packaged application selection
- Process design and reengineering

Technology Solutions

By focusing on business objectives and end-to-end processes, Actionable Strategies truly delivers solutions.

While technology may be an important element of the solution, technology in itself is merely an enabler. Our focus on driving outcomes increases the success rate for clients. As a true consulting firm that does not resell products, we recommend and implement the technologies that are best suited to the client's needs. For us, project success is meeting business objectives and technology implementation is the start, not the finish.

Infrastructure

Foundational technologies can act as either enablers or constraints. By taking a holistic view of the computing environment, Actionable Strategies provides clients with core technology platforms that are non-disposable, durable, robust and extensible. This allows client to focus on extracting business value with the confidence that the underlying infrastructure will accommodate present and future needs.

- Cloud strategies and implementation
- Network architecture and design
- Mobile and remote computing solutions
- System management and monitoring

IT Risk Management

Business and technology leaders have a responsibility to actively assess and eliminate risks. Actionable

Strategies ensures that clients are addressing the most critical vulnerabilities while controlling the costs to mitigate lower priority risks. By focusing on business exposure in addition to threat profiles, we ensure that spending is aligned to business risk.

- Information security assessment
- Security policies, architecture and training
- Business Continuity Planning
- Disaster Recovery Planning
